Objective

I am a motivated and fast-learning computer science student with a strong interest in real-world applications of software development and systems engineering. With a solid foundation in programming, databases, and Linux environments, I am looking to contribute to meaningful tech projects where I can apply and expand my skills. Eager to collaborate with experienced teams and grow professionally while making a positive impact through technology.

Education

Bachelor of science | Helwan University | 2027

- Major: Mathematics and computer science
- GPA: 3

Experience

National Telecommunication Institute (NTI) – Egypt

Full-Stack Web Development (MEAN Stack)

[Aug 2024 – Sep 2025]

- Built scalable web applications using MongoDB, Express.js, Angular, and Node.js (MEAN).
- Applied best practices in secure coding with a cybersecurity focus.
- Contributed to projects simulating real-world industry scenarios.

Digital Egypt Pioneers Initiative (DEPI) – Ministry of Communications & IT, Egypt

Networking & Cybersecurity Training (CCNA & Fortinet)

[Jul 2024 – Dec 2025]

- Completed hands-on training in CCNA networking fundamentals.
- Gained practical experience with Fortinet security solutions.
- Developed skills in network configuration, security, and troubleshooting.

Projects

Company Database Management System

Technologies used: SQL

- Designed and implemented a relational database for a small company structure with tables for departments, employees, and relationships.
- Wrote SQL queries to create, manage, and retrieve data using JOIN, GROUP BY, WHERE, and other clauses.
- Ensured referential integrity with primary and foreign key constraints.
- Demonstrated proficiency in data normalization and basic database administration.

Courses

Problem Solving

ICPC Helwan Community

- Introduction to programming language C++
- Covered The fundamentals of Computer Science OOP, data Structure and Algorithms using C++
- Solving competitive programming problems using C++

Soft Skills

- Self-motivative
- Critical thinking
- Communication
- Teamwork
- Curiosity
- Problem solving

Technical Skills

- Programming Languages: C, C++, Python, SQL, Bash
- Web Development: HTML, CSS, JavaScript (basic), Node.js
- Databases: SQL, Relational Database Design, Normalization, SQL Queries
- Operating Systems: Linux (Arch, Kali), Windows
- Tools & Technologies: Git, GitHub, VS Code, VirtualBox, Terminal
- Cybersecurity: Networking Basics, CCNA, Kali Linux, Ethical Hacking Fundamentals
- Computer Science Concepts: Object-Oriented Programming (OOP), Data Structures, Algorithms
- Web Development Framework: MEAN Stack (MongoDB, Express.js, Angular, Node.js)
